

The background of the image is a high-magnification, grayscale micrograph of a semiconductor chip. It shows a complex array of microstructures, including various sized squares, rectangles, and circular patterns, which are likely different functional blocks or components of the chip. The overall texture is highly detailed and technical.

2023 8th Symposium on AI-Embedded System-on-Chip

Kyungpook National University, Daehak-ro 80, No. 724, Daegu, Korea, Dec. 6, 2023

AI-Embedded S²oftware-on-Chip (AI-SoC) Lab
